Battle of Neighborhoods

Newyork Restaurants

Problem Background:

- The City of New York, is the most populous city in the United States. It is diverse and is the financial
- capital of USA. It is multicultural. It provides lot of business oppourtunities and business friendly
- environment. It has attracted many different players into the market. It is a global hub of business and
- commerce. The city is a major center for banking and finance, retailing, world trade, transportation,
- tourism, real estate, new media, traditional media, advertising, legal services, accountancy, insurance,
- theater, fashion, and the arts in the United States.
- This also means that the market is highly competitive. As it is highly developed city so cost of doing
- business is also one of the highest. Thus, any new business venture or expansion needs to be analysed
- carefully. The insights derived from analysis will give good understanding of the business
- environment which help in strategically targeting the market. This will help in reduction of risk. And
- the Return on Investment will be reasonable.

Problem Description:

- A restaurant is a business which prepares and serves food and drink to customers in return for money,
- either paid before the meal, after the meal, or with an open account. The City of New York is famous
- for its excelllent cuisine. It's food culture includes an array of international cuisines influenced by the
- city's immigrant history.
- 1. Central and Eastern European immigrants, especially Jewish immigrants - bagels, cheesecake,
- hot dogs, knishes, and delicatessens
- 2. Italian immigrants - New York-style pizza and Italian cuisine
- 3. Jewish immigrants and Irish immigrants - pastrami and corned beef
- 4. Chinese and other Asian restaurants, sandwich joints, trattorias, diners, and coffeehouses are
- ubiquitous throughout the city
- 5. mobile food vendors - Some 4,000 licensed by the city
- 6. Middle Eastern foods such as falafel and kebabs examples of modern New York street food
- 7. It is famous for not just Pizzerias, Cafe's but also for fine dining Michelin starred
- restaurants.The city is home to "nearly one thousand of the finest and most diverse haute
- cuisine restaurants in the world", according to Michelin.
- So it is evident that to survive in such competitive market it is very important to startegically plan.

Various factors need to be studied inorder to decide on the Location such as :

1. New York Population
2. New York City Demographics
3. Are there any Farmers Markets, Wholesale markets etc nearby so that the ingredients can be
purchased fresh to maintain quality and cost?
4. Are there any venues like Gyms, Entertainmnet zones, Parks etc nearby where floating
population is high etc
5. Who are the competitors in that location?
6. Cuisine served / Menu of the competitors
7. Segmentation of the Borough
8. Untapped markets
9. Saturated markets etc

Target Audience:

The objective is to locate and recommend which
neighborhood of Newyork
city will be best choice to start a restaurant. Also has to present
the rationale
of the recommendations made.
This would interest anyone who wants to start a new
restaurant in Newyork city.

Success Criteria:

The success criteria of the project will be a good recommendation of borough/Neighborhood choice based on Lack of such restaurants in that location and nearest suppliers of ingredients.

Data 1

Newyork City will be analysed in this project .

We will be using the below datasets for analysing Newyork city

Data 1 : Neighborhood has a total of 5 boroughs and 306 neighborhoods. In order to segement the neighborhoods and explore them, we will essentially need a dataset that contains the 5 boroughs and the neighborhoods that exist in each borough as well as the the latitude and logitude coordinates of each neighborhood.

This dataset exists for free on the web. Link to the dataset is :

https://geo.nyu.edu/catalog/nyu_2451_34572

	Borough	Neighborhood	Latitude	Longitude
0	Bronx	Wakefield	40.894705	-73.847201
1	Bronx	Co-op City	40.874294	-73.829939
2	Bronx	Eastchester	40.887556	-73.827806
3	Bronx	Fieldston	40.895437	-73.905643
4	Bronx	Riverdale	40.890834	-73.912585

Data 2 :

- Second data which will be used is the DOHMH Farmers Markets and Food Boxes dataset. In
- this we will be using the data of Farmers Markets.
- https://data.cityofnewyork.us/dataset/DOHMH-Farmers-Markets-and-Food-Boxes/8vwk-6iz2
- Website-https://www.grownyc.org/greenmarketco/foodbox
- GrowNYC's Fresh Food Box Program is a food access initiative that enables under-served
- communities to purchase fresh, healthy, and primarily regionally grown produce well below
- traditional retail prices.
- A farmers' market is often defined as a public site used by two or more local or regional producers
- for the direct sale of farm products to consumers. In addition to fresh fruits and vegetables, markets
- may sell dairy products, fish, meat, baked goods, and other minimally processed foods.

Data 3

- For the below analysis we will get data from wikipedia as given below :
- 1. New York Population
- 2. New York City Demographics
- 3. Cuisine of New York city
- https://en.wikipedia.org/wiki/New_York_City
- https://en.wikipedia.org/wiki/Economy_of_New_York_City
- https://en.wikipedia.org/wiki/Portal:New_York_City
- https://en.wikipedia.org/wiki/Cuisine_of_New_York_City
- Data 4 : Newyork city geographical coordinates data will be utilized as input for the Foursquare API,
- that will be leveraged to provision venues information for each neighborhood.We will use the
- Foursquare API to explore neighborhoods in New York City. The below is image of the Foursquare
- API data.

	Neighborhood	NeighborhoodLatitude	NeighborhoodLongitude	Venue	VenueLatitude	VenueLongitude	VenueCategory
0	Marble Hill	40.876551	-73.91066	Arturo's	40.874412	-73.910271	Pizza Place
1	Marble Hill	40.876551	-73.91066	Bikram Yoga	40.876844	-73.906204	Yoga Studio
2	Marble Hill	40.876551	-73.91066	Tibbett Diner	40.880404	-73.908937	Diner
3	Marble Hill	40.876551	-73.91066	Sam's Pizza	40.879435	-73.905859	Pizza Place
4	Marble Hill	40.876551	-73.91066	Loeser's Delicatessen	40.879242	-73.905471	Sandwich Place

Methodology :
Business Understanding :
Our main goal is to get optimum location for new restaurant business in New York City.

Analytic Approach :
New York city neighbourhood has a total of 5 boroughs and 306 neighborhoods. In this project first
part is clustering of Manhattan and Brooklyn . And second part is clustering of Bronx, Queens and
Staten Island. This is done because of the following Exploratory data analysis.

Exploratory Data Analysis:

- Data 1- New york city Geographical Coordinates Data.
- 1. In this we load the data and explore data from newyork_data.json file.
- 2. Transform the data of nested python dictionaries into a pandas dataframe.
- 3. This dataframe contains the geographical coordinates of New York city neighborhoods.
- 4. This data will used to get Venues data from Fouresquare.
- 5. We used geopy and folium libraries to create a map of New York city with neighborhoods
- superimposed on top.

New York neighbourhood visualization
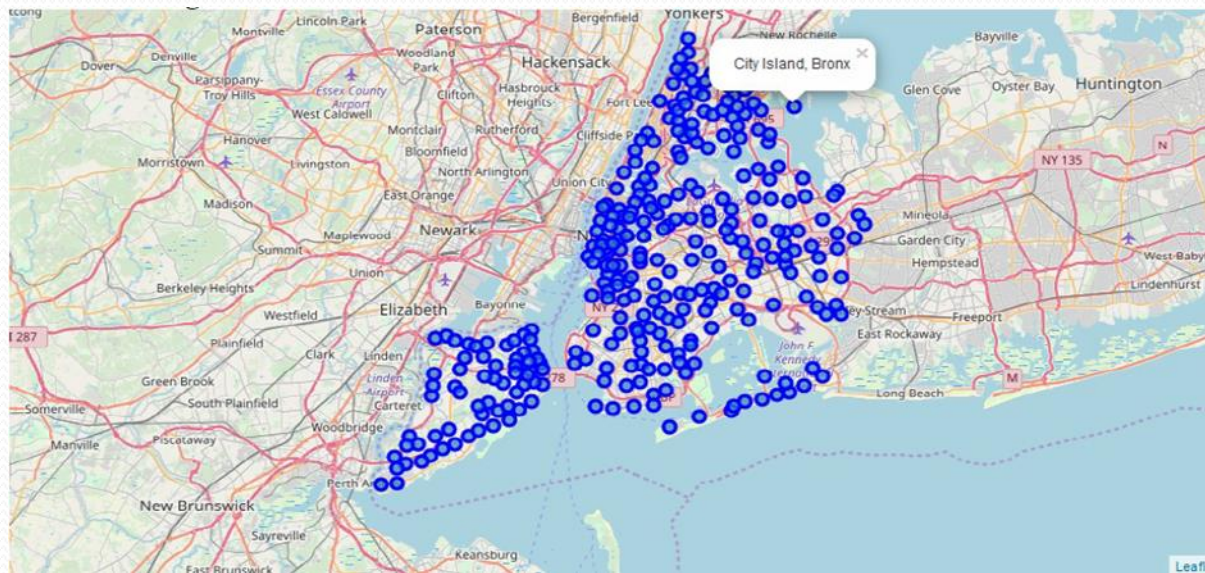

Data 2

Data 2- Second data which is used is the DOHMH Farmers Markets and Food Boxes dataset. In this we will be using the data of Farmers Markets data.
There are totally 144 Farmers Markets in New York city. Highest number are in Manhattan and Brooklyn.
And lowest in Queens, Bronx and Staten Island.
The proof of this is as given below.
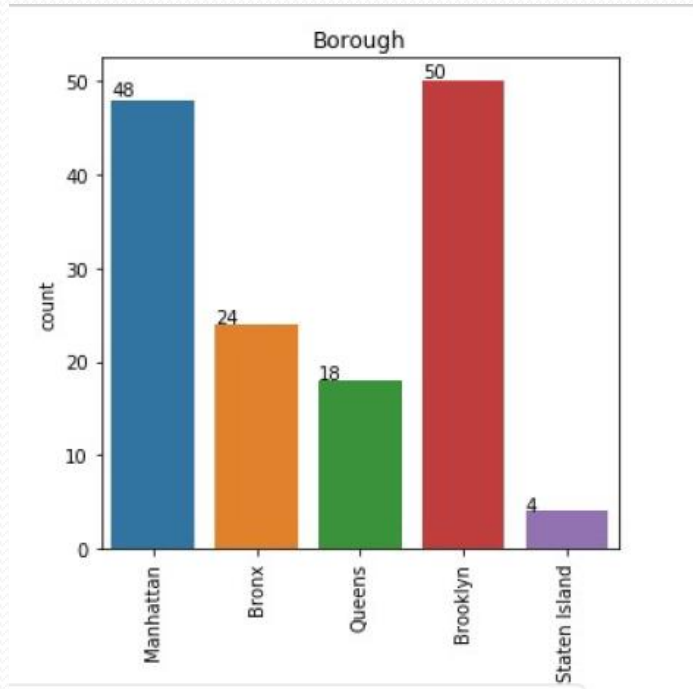

Farmers Market visualisation-New York City

Data 3

- To analyize New York city Population, Demographics and Cuisine , scrapped the data from

- Wikipedia pages given above in the data section. We used BeautifulSoup python library. Beautiful

- Soup is a Python package for parsing HTML and XML documents (including having malformed

- markup, i.e. non-closed tags, so named after tag soup). It creates a parse tree for parsed pages that can

- be used to extract data from HTML, which is useful for web scraping

1.Newyork population

from the data :

□ Manhattan (New York County) is the geographically smallest and most densely populated borough.

□ Manhattan's (New York County's) population density of 72,033 people per square mile (27,812/km²) in 2015 makes it the highest of any county in the United States and higher than the density of any individual American city.

□ Brooklyn (Kings County), on the western tip of Long Island, is the city's most populous borough.

□ Queens (Queens County), on Long Island north and east of Brooklyn, is geographically the largest borough.

|	Borough	County	Estimate_2017	square_miles	square_km	persons_sq_mi	persons_sq_km
0	Manhattan	New York	1,664,727	22.83	59.13	72,033	27,826
1	The Bronx	Bronx	1,471,160	42.10	109.04	34,653	13,231
2	Brooklyn	Kings	2,648,771	70.82	183.42	37,137	14,649
3	Queens	Queens	2,358,582	108.53	281.09	21,460	8,354
4	Staten Island	Richmond	479,458	58.37	151.18	8,112	3,132
5		City of New York	8,622,698	302.64	783.83	28,188	10,947
6		State of New York	19,849,399	47,214	122,284	416.4	159

2. Newyork city demographies

New York City is the most populous city in the United States,[9]
with an estimated record high of 8,622,698 residents as of 2017,[7] incorporating more immigration
into the city than outmigration since the 2010 United States Census.
The racial composition is as given below. This is the reason New York city has restaurants serving
cuisine from many countries such as Indian, African, Japan etc. This also increases the scope for
restaurants business in New York City.

	Racialcomposition	2010	1990	1970	1940
0	White	44.0%	52.3%	76.6%	93.6%
1	—Non-Hispanic	33.3%	43.2%	62.9%	92.0%
2	Black or African American	25.5%	28.7%	21.1%	6.1%
3	Hispanic or Latino (of any race)	28.6%	24.4%	16.2%	1.6%
4	Asian	12.7%	7.0%	1.2%	–

3. Cuisine of Newyork city
This data has been manually prepared. Data is taken from Wikipedia
page - https://en.wikipedia.org/wiki/Cuisine_of_New_York_City . Using this data we did word cloud.

NEW YORK CITY CUISINE : Most Preferred Food in New York City –Italian, Purto Rican,
Mexican, Jewish, Indian, Pakistani & Dominican.
Brooklyn cuisine

Most Preferred Food in Brooklyn is –Italian, Purto Rican & Mexican

Manhattan cuisine

Most Preferred Food in Manhattan is – Italian, American, Puerto Rican and Indian.

Queens cuisine

Most Preferred Food in Queens is – Indian, Irish, Pakistani and Mexican.

Bronx cuisine

Most Preferred Food in The Bronx is – Italian,Puerto Rican, Albanian and Dominican.

Data 4

NewYork city geographical coordinates data has be utilized as input for the Foursquare
API, that has been leveraged to provision venues information for each neighborhood. We used the
Foursquare API data to explore neighborhoods in New York City.

**Brooklyn and Manhattan Visualization :**
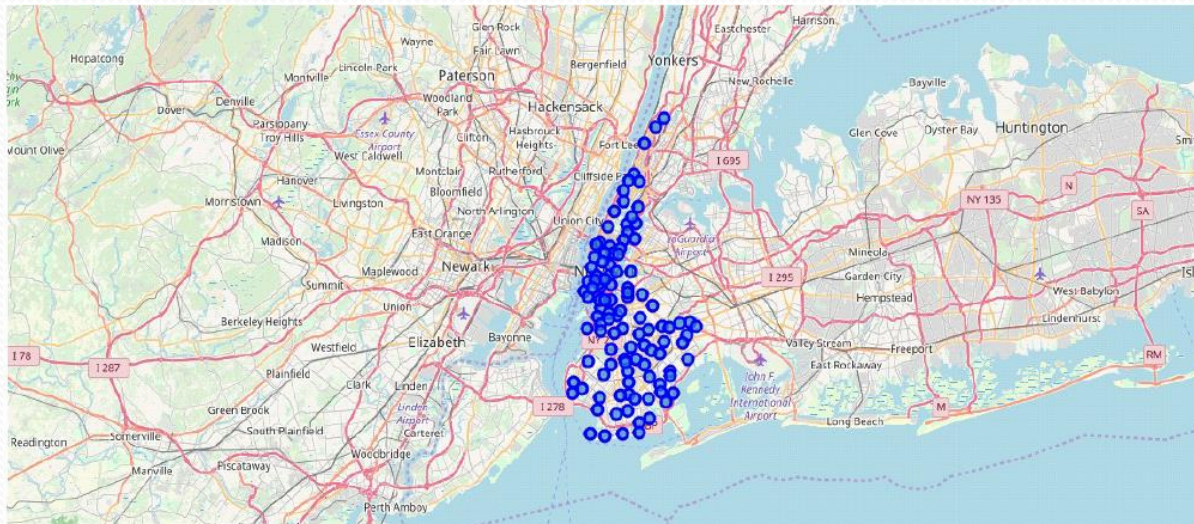

Using the geographical coordinates of each neighbourhood foursquare API calls are made to get top 200 venues in a radius of 1000 meters. The venues data is as given below :
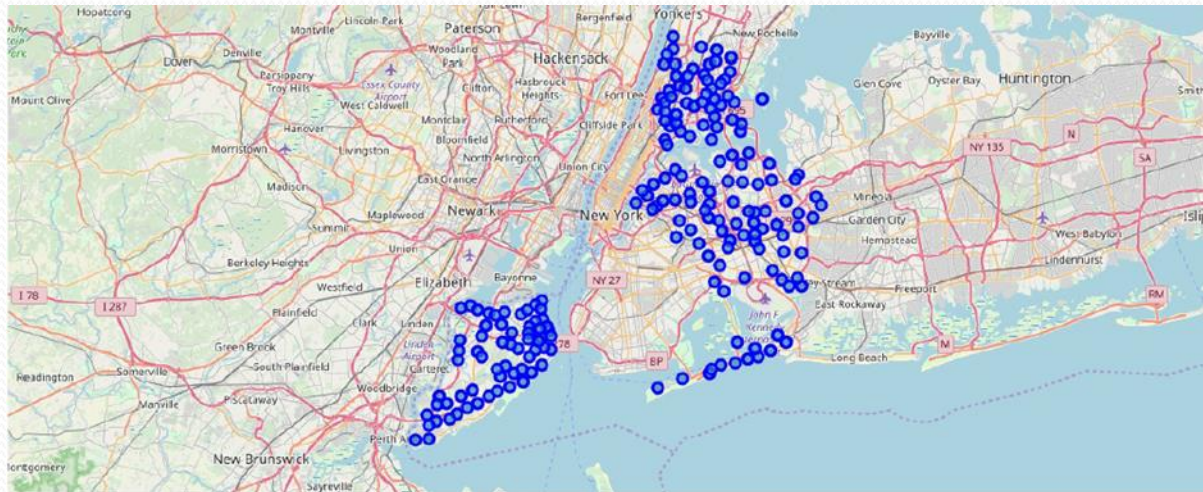

Brooklyn and Manhattan Venues :

	Neighborhood	NeighborhoodLatitude	NeighborhoodLongitude	Venue	VenueLatitude	VenueLongitude	VenueCategory
0	Marble Hill	40.876551	-73.91066	Arturo's	40.874412	-73.910271	Pizza Place
1	Marble Hill	40.876551	-73.91066	Bikram Yoga	40.876844	-73.906204	Yoga Studio
2	Marble Hill	40.876551	-73.91066	Tibbett Diner	40.880404	-73.908937	Diner
3	Marble Hill	40.876551	-73.91066	Sam's Pizza	40.879435	-73.905859	Pizza Place
4	Marble Hill	40.876551	-73.91066	Loeser's Delicatessen	40.879242	-73.905471	Sandwich Place

Brooklyn and Manhatten venues visualization

Generated the below Brooklyn and Manhattan
Venues Visualization. The "BM_venues" dataframe has 9708 venues and 397 unique venue types.
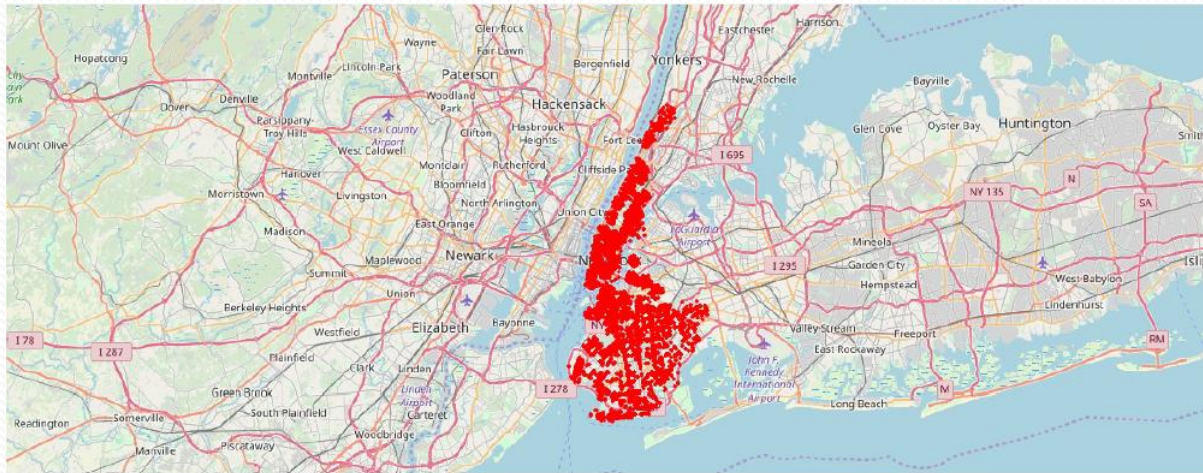

# Bronx, Queens and Staten Island Neighborhoods Visualization :

Bronx, Queens and Staten Island Venues Visualization

The "BQS_venues" dataframe has 10805 venues and 387 unique venue types.

	Neighborhood	NeighborhoodLatitude	NeighborhoodLongitude	Venue	VenueLatitude	VenueLongitude	VenueCategory
0	Wakefield	40.894705	-73.847201	Lollipops Gelato	40.894123	-73.845892	Dessert Shop
1	Wakefield	40.894705	-73.847201	Ripe Kitchen & Bar	40.898152	-73.838875	Caribbean Restaurant
2	Wakefield	40.894705	-73.847201	Jackie's West Indian Bakery	40.889283	-73.843310	Caribbean Restaurant
3	Wakefield	40.894705	-73.847201	Ali's Roti Shop	40.894036	-73.856935	Caribbean Restaurant
4	Wakefield	40.894705	-73.847201	Rite Aid	40.896521	-73.844680	Pharmacy

**Bronx, Queens and Staten Island Venues Map Visualization :**

4.RESULTS :

- From this venues data we filtered and used only the restaurant data for Brooklyn & Manhattan
- clustering and Bronx, Queens and Staten Island clustering. As we focussed only on restaurants
- business.

- Neighborhood K-Means clustering based on mean occurrence of venue category :

- To cluster the neighborhoods into two clusters we used the K-Means clustering Algorithm. k-means
- clustering aims to partition n observations into k clusters in which each observation belongs to the
- cluster with the nearest mean. It uses iterative refinement approach.

Brooklyn & Manhattan :

In the below Map Visualization, we can see the different types of clusters created by using K-Means for Brooklyn & Manhattan.
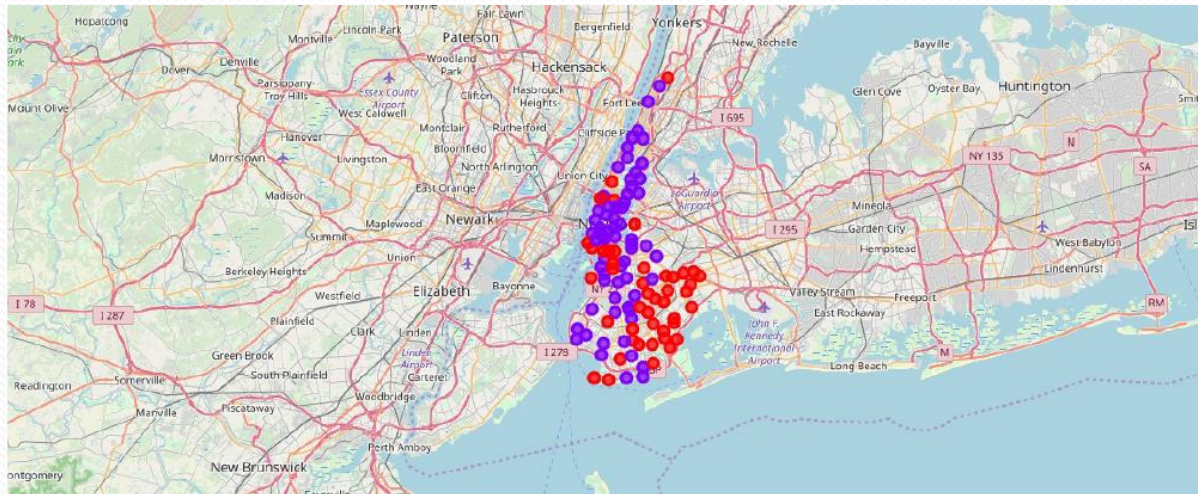

Cluster0 : The Total and Total Sum of cluster0 has smallest value. It shows that the market is not saturated.
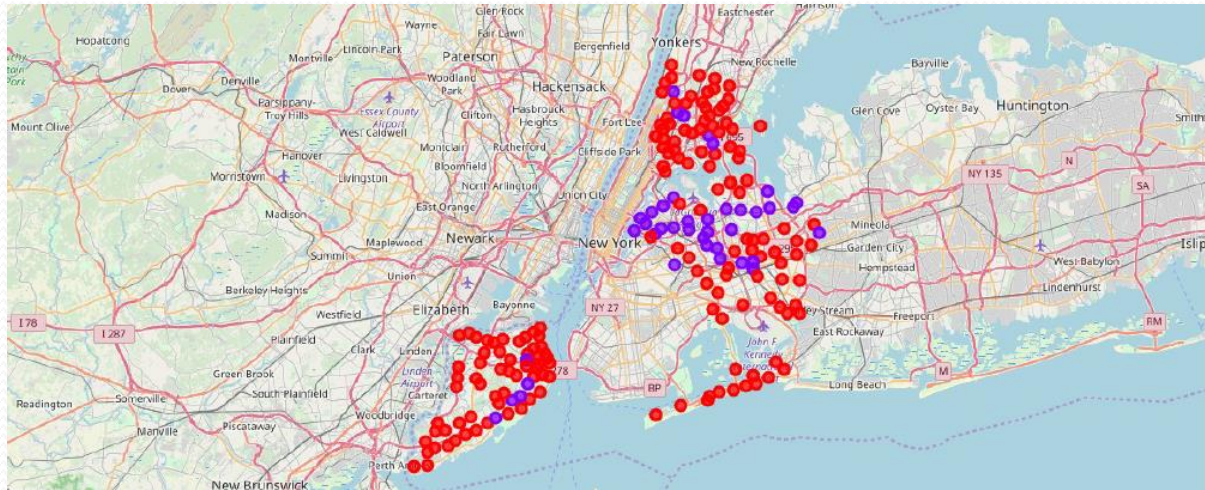

Cluster1 : The Total and Total Sum of cluster1 has highest value. It shows that the markets are saturated. Number of restaurants are very high.

There are no untapped neighborhoods in Brooklyn and Manhattan.

Bronx, Queens and Staten Island :

In the below Map Visualization, we can see the different types of clusters created by using K-Means for Bronx, Queens and Staten Island.

Cluster0 : The Total and Total Sum of cluster0 has smallest value. It shows that the market is not saturated. There are untapped neighborhoods. List is as given below.

	Borough	Neighborhood	Latitude	Longitude	Total	Cluster_Labels
0	Staten Island	Todt Hill	40.597069	-74.111329	0	0
1	Staten Island	Port Ivory	40.639683	-74.174645	0	0
2	Staten Island	Bloomfield	40.605779	-74.187256	0	0

Cluster1: The Total and Total Sum of cluster1 has highest value. It shows that the markets are saturated. Number of restaurants are very high.

Discussion and conclusion

5. DISCUSSION:
1. There is scope to increase Farmers markets in Bronx, Queens and Staten Island.
2. There is scope to explore cuisines of various countries in Bronx, Queens and Staten Island.
3. In Manhattan and Brooklyn restaurants of cuisines of many countries are available. So if risk can be taken with great menu on board. It also shows people love eating cuisines of various countries.

6. CONCLUSION:
This analysis is performed on limited data. This may be right or may be wrong. But if good amount of data is available there is scope to come up with better results. If there are lot of restaurants probably there is lot of demand. Brooklyn and Manhattan has high concentration of restaurant business. Very competitive market. Bronx, Queens and Staten Island also has good number of restaurants but not as many as required. So this can be explored.
As per the neighbourhood or restaurant type mentioned like Indian Restaurant analysis can be checked. A venue with lowest risk and competition can be identified.
